

NRG Engineering

The Power to Deliver™

Career Guide

NRG Engineering: The Power to Deliver ●

A Leader in the Oil and Gas Industry Consulting

Founded in 2005 in Singapore, **NRG Engineering** has built a unique reputation as the provider of high level consulting solutions for the oil and gas industry. Whether it is working with EPC contractors or oil companies, **NRG Engineering** relies on its experienced and dedicated team to take on lead responsibilities in turnkey projects, to share its expertise with clients and to improve general project practices.

We distinguish ourselves in our renewed focus to deliver faster services, a better understanding of the engineering challenges and stronger relationships with our clients. This is achieved thanks to a motivated and knowledgeable team, able to adapt to new situations and environments.

Unique Career Opportunities ●

An exciting place at an exciting time

NRG Engineering offers multiple promotion opportunities for its talented employees.

The Consultants and Managers joining **NRG Engineering** are all graduates from top engineering schools, business schools and universities and are all selected for their outstanding expertise and interpersonal skills.

Whether they join **NRG Engineering** as Consultants or as Managers, they are all thrust into key responsibilities delivering solutions to leaders in the oil and gas industry.

Consulting with CEOs, Project Directors and Engineering Managers, and working with other highly qualified professionals from the **NRG Engineering** group, they have a unique opportunity to develop their professional network as well as their client interfacing skills rapidly.

CAREER PROFILES

CONSULTANTS:

EXPERT ENGINEERS AND SOLUTION FINDERS

Selected for their experience and their potential, the engineers who are engaged as consultants get involved in high-profile projects around the globe.

Each team member, whether Consultant, Senior Consultant or Principal Consultant, brings his own unique skills and creativity to every project. On a daily basis, they work closely with our clients, managers or consultants.

A consultant relies on his Manager and HR Department to help him drive and develop his career with mid to long-term perspectives. An **NRG Engineering** consultant can develop his technical expertise and/or choose to improve his managerial and client interfacing skills: he is in control of his career and surrounded by the best.

BUSINESS MANAGERS:

ENTREPRENEURS AND ACHIEVERS

NRG Engineering Business Managers are real entrepreneurs, autonomously managing their own business units. They initiate, establish and build long-term relationships with their clients.

They are also responsible for building and managing their teams of engineering consultants, as well as developing unique offers for their target markets.

Their success depends on their ability to understand their clients challenges, and to connect with their engineering teams. Their goal is to ensure the quality of the work and the growth of their business unit.

Challenge Yourself ●

Our goal is to become Asia's leading engineering consulting company in the oil and gas industry by 2010

A career as an **NRG Engineering** consultant is a unique opportunity to develop yourself and increase your responsibilities in a rapidly growing company.

Our talented group of engineers and managers will challenge you to expand your skills on a daily basis. They will also become an essential part of your professional network for the rest of your career.

If you are a quick learner and if you can apply creative thinking to deliver better solutions to our clients, you will thrive in our environment and you will build strong credentials with the leading oil and gas companies and EPC contractors in the process.

Our experienced management and administrative staff are there to support our consultants and to make sure they can be fully focused on the projects – and continue to build the company's reputation as the consulting group with "The Power to Deliver".

RECRUITMENT PROCESS

NRG Engineering prides itself on its selective recruitment process, which will be explained to applicants in the course of their first interview. Successful applicants will go through at least three interviews before receiving an offer in order to assess their analytical, interpersonal and technical skills. Please contact our HR Department directly to inquire about the status of your application at any stage.

HOW TO APPLY

To be considered for employment with **NRG Engineering**, please visit the career section of our website: www.nrgengineering.com

You can upload your resume directly on our website as a direct application or in response to a specific job opening. Your application will then be reviewed by our HR department and redirected to the appropriate managers for consideration.

Consultant's testimonials ●

Being a Consultant with NRG Engineering is all about grasping and fulfilling opportunities

BOON LENG, SENIOR CONSULTANT

“ Just like Singapore, NRG Engineering attracts talent from all over the world making it a truly multicultural environment. The company is successful in getting involved in most of the important projects in the region, so I can continue to be challenged by my work as well as by my colleagues.

When I joined NRG Engineering, I was first involved on a project in Malaysia. I am now managing the construction of the jetty for Vietnam's first refinery.”

Boon Leng has over 15 years of experience in Project Management, Construction, Contract, Administration & Installation on various engineering projects both onshore and offshore. Before NRG Engineering, he had worked for Kvaerner, Hindustan Shipyard and SembCorp Engineers.

SYED, CONSULTANT

“ The managers at NRG Engineering understood my motivation and saw my potential. Since I've joined NRG Engineering, I've been working to develop the Supply Chain Management Centre of Excellence while getting involved in various Contract Management and Logistics projects in the region.

NRG Engineering manages to build trust with its clients because it has confidence in its employees.”

Syed has 10 years of experience with Schlumberger and DHL where he has developed an expertise in logistics and supply chain, specialized in the oil and gas industry.

JOHN, PRINCIPAL CONSULTANT

“ The team of NRG Engineering has a contagiously high level of energy and enthusiasm and I immediately recognized it as an opportunity to surround myself with competent individuals who could make a difference.

In this rapidly growing team, I have the opportunity to develop new services and to present solutions which I can really call my own.”

John has 35 years of experience in the oil and gas industry. Prior to becoming a Principal Consultant with NRG Engineering, he has held management positions with Foster Wheeler in Thailand and has worked in subsea and pipeline engineering with companies such as JP Kenny, ABB, Shell, Conoco, BP, Chevron and Exxon.
